

JVC at Final Cut Pro User Group SuperMeet

After the success of the first annual SuperMeet held in London, JVC Professional Europe Ltd. are pleased to announce that they will exhibit their ProHD camcorders at the second Annual FCPUG Amsterdam SuperMeet.

The SuperMeet, which will be held at The Grand Hotel Krasnapolsky in Amsterdam on Sunday 13 September, will play host to an array of Final Cut Pro users and will have guest speakers including a demonstration from JVC.

JVC's Product Manager for Creation Products, Semir Nouri, and Mac Video's Rick Young will be speaking about the GY-HM100 camera's workflow on stage at this year's Amsterdam show. JVC's new solid-state camcorders, the [GY-HM100](#) and [GY-HM700](#), both allow users to edit immediately using native FCP format or native MP4 (XDCAM-EX) format.

So, if you'd like to know more about JVC's Solid-State camcorders, [click here](#) to apply for SuperMeet tickets.
