

## JVC Professional at Apple's Pro Studio series 09

### JVC Professional will exhibit their ProHD camcorders at Apple's Pro Studio series 09.

JVC will showcase easy workflow with their latest camcorders, the GY-HM100 and GY-HM700, which are the world's first professional camcorders that natively record Apple's QuickTime (MOV) file format for Final Cut Pro. Files can be read directly into Apple's popular editing system, and for compatibility with other NLE systems.

Recording to twin SDHC memory cards, the GY-HM100 and GY-HM700 represent a new generation of camcorders that make continuous HD shooting and seamless software integration a reality.

Held on across Europe, the Final Cut sessions will demonstrate over 100 new features in the new Final Cut Studio and Final Cut Server. JVC will demonstrate easy workflow with both solid-state camcorders enabling you to work faster in post production.

The event is free to attend but spaces are limited so [register now](#) to be sure of your place.
