

## New products now available online

JVC Professional Europe Ltd. is pleased to announce the **DT-V9L3D 9** LCD monitor, **DLA-RS25** ultra high definition projector and the super slim **GD-32X1E** LCD monitor and accompanying speakers, **TS-C32SPG**, are now available online.

**GD-32X1** is a stunningly-thin and lightweight full-HD 32" panel, designed for gorgeous image reproduction. Just 6.4mm in depth at its thinnest point, and weighing a mere 5.7kg, the GD-32X1 features advanced technology, delivering a versatile performance for any application. **TS-C32SPG** speakers to accompany JVC's super slim screen, are also now available online.

Upgraded to suit user needs, the **DT-V9L3D** monitor offers excellent quality and has an easy-to-use design. Key front panel functions are back-lit. Analogue-style rotary controls with indent position give speedy, accurate control. The simple OSM menu structure has been designed for rapid set-up, which is particularly helpful in field applications.

JVC's new **DLA-RS25** projector delivers high-definition images and offers full HD 1920 x 1080 pixels. The DLA-RS25 has a 50.000:1 contrast ratio, and is high-contrast, high-grade projector which features Adjustable Colour Matrix and D-ILA Technology.
