

In control with AMX

Press Release

London, UK, 1 October 2008 - JVC Professional Europe Ltd has joined the AMX® Device Discovery Program which aims to significantly reduce the time required to integrate JVC's award-winning VN-V686U IP Network Dome Camera with AMX NXP-PLV Modero PosiTrack Pilot Camera Controller. The system was demonstrated on the JVC stand at Security Essen, Germany on Stand 527, Hall 2, between 7-10 October 2008.

When integrating an IP device, such as the JVC dual-stream VN-V686U IP PTZ Dome Camera with direct drive motor, the AMX Control System intuitively recognizes the camera, loads the appropriate operational module and manages the new device automatically, thus significantly reducing installation and operation time. AMX and JVC have a strong history of producing products successfully integrated into a host of diverse installations and markets says Keisuke Yoshikawa, Chief Executive Officer, JVC Professional Europe Ltd. We look forward to working on future projects with AMX which will undoubtedly benefit security installation companies in the set-up, control and management of their security and surveillance operations.

The JVC Device Discovery module is available for download free of charge to authorised AMX dealers via the AMX website (www.amx.com).
